

2010 Investigator Training Committee

The Investigator Training Committee was notified by email regarding a meeting to be held Tuesday, August 31, 2010, to discuss and begin to finalize an agenda for a structural PIRT to be held in Atlanta in September, 2011. Derrick Lastinger is the SLA designated host contact and is coordinating dates with Orkin to utilize their training facility.

John Scott, ASPCRO ITC PIRT/PREP liaison, has participated in regular meetings with both the PIRT and PREP steering committees. The PIRT/ASPCRO training course is being proposed for September 2011. Attached is the draft PIRT training schedule being proposed for 2011 – 2013. Training subjects being proposed are soil fumigation enforcement and labels, fumigants, product specific training/issues, and container containment. Another structural PIRT was discussed and a suggestion that it be held in 2012-13 on bedbugs and possibly some bee issues. PIRT is looking for states to host many of these courses, preferably a Western state. Please contact John Scott if you have an interest in hosting a future structural PIRT.

For the Committee,

George N. Saxton - Chair
