Label Language Stewardship Committee
2013 ASPCRO Annual Board Meeting Report

On behalf of the ASPCRO Label Language Stewardship Committee, (3C), I submit the following report for the 2013 annual board meeting.

The committee has not had much activity since the mid-year meeting due unfortunately to the chair's schedule.

The committee will be meeting during the annual conference in Atlanta for an informal meeting to discuss next steps and direction of upcoming efforts including EPA's re-registration of fumigant active ingredients, development of the pyrethroid label language guidance document, and the label language guideline document. A conference call will be held with members in the weeks following the conference. The chair will also contact EPA to discuss the committee's efforts with the agency including providing comments for the agency's label review manual where it addresses structural pest control use label language.

The chair has begun discussion on development of a consolidated approach to label issues as indicated in a previous committee report, through contact with the Pesticide Operation and Management Committee chair.

Respectfully submitted,

Bonnie Rabe, Chair and ASPCRO Past President
