Page 1: Introduction

Q1

Please indicate the state you represent (using a two-letter code).

LA

Q2

Respondent skipped this question

What is the name of the agency you represent?

Q3

What is your name?

Kevin Wofford

Q4

May we have your email address?

kwofford@ldaf.state.la.us

Q5

Regarding the 2008 Reregistration Eligibility Decision (RED) mitigations for first generation anticoagulant rodenticides (FGARs) and second-generation anticoagulant rodenticides (SGARs), risk assessments indicate that wildlife incidents have not changed. With this information in mind, what further mitigation measures would you consider/recommend that may reduce exposure of wildlife to SGARs?

None

Q6

No

Do you have any state specific concerns/issues regarding current rodenticide labels?

Q7

Respondent skipped this question

If you responded "yes" to Question #6, which use pattern are you primarily concerned with?

Q8

No

Do you have any state specific concerns/issues regarding rodenticide use?

Q9

Respondent skipped this question

If you responded "yes" to Question #8, which use pattern are you primarily concerned with?

Q5

Regarding the 2008 Reregistration Eligibility Decision (RED) mitigations for first generation anticoagulant rodenticides (FGARs) and second-generation anticoagulant rodenticides (SGARs), risk assessments indicate that wildlife incidents have not changed. With this information in mind, what further mitigation measures would you consider/recommend that may reduce exposure of wildlife to SGARs?

We need to steer industry towards a paradigm shift by way of educating them that SGA should not be the first tool out of the box for rodent control. That being said there are certainly instances were SGA are absolutely the go to product.

Q6

Yes

Do you have any state specific concerns/issues regarding current rodenticide labels?

Q7

If you responded "yes" to Question #6, which use pattern are you primarily concerned with?

Homeowner use,

Please explain the reasons for your response to this question.:

It is still extremely easy for a homeowner to access SGA via the internet. And, I have a concern that FGA, still available through the channels of trade are being misused by homeowners.

Q8

Yes

Do you have any state specific concerns/issues regarding rodenticide use?

Q9

If you responded "yes" to Question #8, which use pattern are you primarily concerned with?

Homeowner use,

Please explain your response to this question.:

See question number 8.

Q5

Regarding the 2008 Reregistration Eligibility Decision (RED) mitigations for first generation anticoagulant rodenticides (FGARs) and second-generation anticoagulant rodenticides (SGARs), risk assessments indicate that wildlife incidents have not changed. With this information in mind, what further mitigation measures would you consider/recommend that may reduce exposure of wildlife to SGARs?

No recommendations at this time.

Q6

Yes

Do you have any state specific concerns/issues regarding current rodenticide labels?

Q7

If you responded "yes" to Question #6, which use pattern are you primarily concerned with?

Both,

Please explain the reasons for your response to this question.:

The label is typically not read by the person applying the product. They are "trained to use"(technicians going off the instruction of someone else rather than reading the label themselves/homeowners getting information from the internet professionals or DIY's) the product by someone else and that training may be out of date or wrong (homeowner/professional use). The label is present but people do what they are "trained" to do rather than what the label says.

Q8

No

Do you have any state specific concerns/issues regarding rodenticide use?

Q9

If you responded "yes" to Question #8, which use pattern are you primarily concerned with?

Homeowner use,

Please explain your response to this question.:

The homeowner may not have any training and will most likely use it in the same manner as they have always used the product or in the same way that their parents used it.

IP Address: 158.145.14.25

Page 1: Introduction

Q1

Please indicate the state you represent (using a two-letter code).

AK

Q2

What is the name of the agency you represent?

Dept. of Environmental Conservation

Q3

What is your name?

Karin Hendrickson

Q4

May we have your email address?

karin.hendrickson@alaska.gov

Q5

Regarding the 2008 Reregistration Eligibility Decision (RED) mitigations for first generation anticoagulant rodenticides (FGARs) and second-generation anticoagulant rodenticides (SGARs), risk assessments indicate that wildlife incidents have not changed. With this information in mind, what further mitigation measures would you consider/recommend that may reduce exposure of wildlife to SGARs?

Eliminate pelleted products. Allowing them for some uses and not others does not make any sense

Q6

Yes

Do you have any state specific concerns/issues regarding current rodenticide labels?

Q7

Both,

If you responded “yes” to Question #6, which use pattern are you primarily concerned with?

Please explain the reasons for your response to this question.:
unenforceable or vague label language

Q8

No

Do you have any state specific concerns/issues regarding rodenticide use?

Q9

Respondent skipped this question

If you responded “yes” to Question #8, which use pattern are you primarily concerned with?

clinton.shettle@vdacs.virginia.gov

Q5

Regarding the 2008 Reregistration Eligibility Decision (RED) mitigations for first generation anticoagulant rodenticides (FGARs) and second-generation anticoagulant rodenticides (SGARs), risk assessments indicate that wildlife incidents have not changed. With this information in mind, what further mitigation measures would you consider/recommend that may reduce exposure of wildlife to SGARs?

- 1) Update label to include requirement for EPA-approved training program for certified applicators to include IPM (e.g. exclusion methodology, etc.).
- 2) Increase required separation from non-target wildlife (e.g. emphasis on indoor usage and/or bait and bait station placement even closer to manmade structures. [e.g. Less than 50 feet.])
- 3) Further increased restrictions on the sale, distribution, and packaging (of SGARS and possibly FGARS) with RUP status as a last resort.

Q6

No

Do you have any state specific concerns/issues regarding current rodenticide labels?

Q7

Please explain the reasons for your response to this question.:
N/A

If you responded “yes” to Question #6, which use pattern are you primarily concerned with?

DE

Q2

What is the name of the agency you represent?

Delaware Department of Agriculture

Q3

What is your name?

Christopher Wade

Q4

May we have your email address?

Christopher.wade@delaware.gov

Q5

Regarding the 2008 Reregistration Eligibility Decision (RED) mitigations for first generation anticoagulant rodenticides (FGARs) and second-generation anticoagulant rodenticides (SGARs), risk assessments indicate that wildlife incidents have not changed. With this information in mind, what further mitigation measures would you consider/recommend that may reduce exposure of wildlife to SGARs?

Stricter label language in regards to bait station placement and post application cleanup of dead rodents when feasible.

Q6**Yes**

Do you have any state specific concerns/issues regarding current rodenticide labels?

Q7

If you responded “yes” to Question #6, which use pattern are you primarily concerned with?

Both,

Please explain the reasons for your response to this question.:

While we recently have not had any reported secondary poisonings, we have had concerned citizens asking for more information on how we regulate the use of rodenticides. This occurs mostly with commercial accounts.

Q8

Do you have any state specific concerns/issues regarding rodenticide use?

No

Q9

If you responded “yes” to Question #8, which use pattern are you primarily concerned with?

Respondent skipped this question
