## **Structural Remediation Committee Report – April 21, 2021**

Chair: Clint Shettle (VA)

Members: Stephen Baca (NM), Mary Begin (D.C.), Linda Boccuzzo (VT), Roger Bryan (NC), Chad Carpenter (WV), Seth Dunlap (AR), Kelly Friend (FL), Cindy Fulton (WY), Cary Gigeure (VT), Brian Kennedy (AZ), Derrick Lastinger (GA), Victor Lennon (NC), Greg Minor (OH), Alan Pugh (AZ), Dave Scott (IN), Kevin Shelton (OK), Kelly Smith (AZ), Sara Vose (VT).

### **Structural Remediation Committee (SRC) Guidance & “Remediapedia” development:**

The SRC met virtually on Monday, April 19, 2021 and was open to both Committee members and interested parties. The group discussed the Remediapedia concept and planned its initial organization and construction. With a new disclaimer available and associated with the ASPCRO website, plans are in place to make Remediapedia accessible through the website to the general public.

A copy of the draft form of Remediapedia was sent to those invited to the SRC meeting to try it out and expose any errors or weaknesses. Two primary requests were made to the meeting’s attendees: 1) submit any final edits, suggestions, and comments regarding Remediapedia, and 2) submit one or more reviewed references to include in the initial draft of Remediapedia.

The final format and means of accessing Remediapedia are to be worked out. With the disclaimer in place and proper protections for the submitters and those potentially in the references established, Remediapedia will be made available through the website.

If you or someone you know, is aware of a reference or references that have been useful in the structural remediation of pesticides, please contact the SRC.

Respectfully submitted,  
Clint Shettle, SRC Chair
